Professional Summary

Computer Science and Engineering student with hands-on experience building, debugging, testing, and evaluating full-stack and AI-assisted software. Experienced in JavaScript, Python, C++, Java, React.js, Node.js, REST APIs, MongoDB, and SQL. Skilled in analyzing AI-generated code, reproducing implementation failures, testing edge cases, identifying incorrect or incomplete behavior, and documenting technical issues clearly. Strong foundations in software engineering, debugging, testing, APIs, DSA, OOP, DBMS, and backend development.

Technical Skills

- **Languages:** JavaScript, Python, C++, Java, SQL
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** MongoDB, MySQL
- **Engineering:** Debugging, Testing, Edge-Case Analysis, Code Review, API Development, Error Analysis, OOP, DSA, DBMS, Computer Networks
- **AI/Tools:** AI-Assisted Development, AI Code Debugging, NLP, Git, GitHub, Docker, CI/CD, AWS

Professional Experience

Prasunet Company Mar 2025 – Apr 2025
AI Code Debugger Intern *Remote*

- Built an AI-powered code debugging platform using the MERN stack, connecting React interfaces with backend services and AI-assisted debugging workflows.
- Analyzed AI-generated debugging results across programming errors and test scenarios to identify incorrect, incomplete, or ineffective solutions.
- Reproduced programming failures, traced implementation issues, and compared expected versus actual behavior to improve debugging accuracy.
- Developed backend APIs and workflows for code submission, debugging requests, structured responses, and result evaluation.
- Tested solutions against different inputs and edge cases to identify failures and inconsistencies before returning debugging results.
- Documented technical issues and debugging findings clearly to support analysis of AI-generated solutions and application behavior.

Spangle Education & Computer Institute Pvt. Ltd. Jun 2021 – Jul 2023
Computer Instructor *Rupandehi, Nepal*

- Trained 100+ students in C/C++, JavaScript, HTML, CSS, programming fundamentals, algorithms, and computer fundamentals through hands-on exercises.
- Designed programming assignments and assessments focused on logical reasoning, debugging, problem-solving, and software development fundamentals.

Projects

Smart Coach LMS – Full-Stack Coaching Center Management Platform *Next.js, React.js, Node.js, MongoDB, REST APIs, NextAuth*

- Built a full-stack LMS with role-based access control for students, instructors, and administrators, covering authentication, courses, enrollments, payments, and live sessions.
- Designed and tested RESTful APIs for authentication, course management, enrollments, payments, student progress, and session tracking.
- Implemented and tested server-side authorization, course-access validation, automated expiry handling, and re-enrollment workflows across different user and access scenarios.
- Debugged API, authentication, authorization, and data-flow issues by reproducing failures and comparing expected versus actual application behavior.
- Integrated YouTube Live and Razorpay for live classes, recordings, course purchases, and batch-wise curriculum management.
- Built analytics dashboards for live sessions and student performance, reducing manual management effort by approximately 60%

JLiveChats – Real-Time Client-Server Chat Application *Java, AWS, Sockets, Swing*

- Designed a client-server architecture using Java sockets for real-time communication between multiple concurrent users.
- Implemented and tested multi-client communication with sub-second message latency during testing.
- Built the desktop client interface using Java Swing and handled socket-based client-server communication.

Education

CMR Institute of Technology 2023 –Oct 2027
Bachelor of Engineering – Computer Science and Engineering *Bengaluru, India*
